> > The General Statement.

Washington, July 10 .- The July report of the department of agriculture shows a very general improvement in the condition of cotton. Winter wheat advances in the general average cot dition from 75 to 79, and spring wheat from 98 to 100. The average of corn is 88, against 85 last July,

been an excess of moisture, interfering with cultivation and promoting the growth of grass. Clean fields are found only in favored districts and on the land of prompt and pushing cultivators. Since June 20th, the growth has been rapid. In the grassy districts the will take place as plant is still small but healthy and making great progress wi h the recent cultivation. The only complaint of draught comes from Central and Southwestern Texas, from the Col-orado to the Ganduloupe. A few counties in South Carolina and Georgia report present need of rain. The recent distribution of moistness has been quite unequal. Adams county, Missi-sippl, has had showers daily for five weeks, and Pike county for six to eight weeks. The general average condition has advanced from

86 to 90. Last July there was an improvement of 3 points, from 89 to 92. Returns for July since 1870 have indicated a higher condition than in June, except in 1871, 1878 and 1879. Spring weather was too variable in temperature and mois-ture, as it usually has been in former years, for the highest-condition of the issued by Governor promise of improvement during July

The Illinois Prospect.

Springfield, Ill., July 10.—The state department of agriculture has received full returns from all counties in the state of the condition of winter wheat, up to July 1st. There has been but little improvement over the returns for three preceding months. The reports indicate that the crop of winter wheat in Illinois will not exceed sixteen millions, or thirty-two millions less than the yield of 1882. The condition of the winter wheat in the northern counties was five per cent better on July 1st than a month ago, and gave a prospect of 87 per cent of ss themselves as highly an average crop. It is likely that the postmaster general's reply to the query whether his decision applies to the agency in this city will take the form of a general order to all postmasters throughout the country, forbidding them to deliver registered letters or cash money orders directed to any agent of M. A. Dauphin. The company intends to test the legality of such an order, should it be issued.

A telegram was read by the postoffice department to-day from the post-master at Memphis, Tenn., reporting that a number of money orders and registered mail packages had been received there for Louisiana Lottery Co., and asking if the recent decision of Postmaster General Gresbam was intended to apply to all agents of the company. Cuief Clerk Walker in reply telegraphed that the decision applied only to agents in New Orleans and New York.

Fraudulent Land Entries.

Over 600 reports have been received by the commissioner of the general land office from thirty special agents engaged in the investigation of fraudulent land entries reported to the first of July. In many of these cases supplemental reports have been called for covering points which are not sufficiently specific to warrant official action. About three hundred and fifty reports show sufficient evidence of fraud to justify the landfoffice in summarily canceiling the entries. The records show without exception that the fraudulent entries, whether homestead or ward fired two shots into his

Payment of Pensions.

The treasury department yester-day and to day issued warrants for the payment of \$14,600,000, on account of army and navy pensions, for the fiscal year ending June 3), 1884. Suit Against the Government,

The case of Florin A. Austin, administratrix of the estate of Sterling Years. S. Austin, against the United States, has been filed in the court of claims under the special action of Congress. This is a claim for \$367,500, for cotton seized during the rebellion.

A clerk in the examiner's division of the pension bureau, named J. J. Alley, and a pension agent named J. C. Delt-mett, were to-day arrested on the charge of having violated the revised statutes in the furtherance of a scheme to defraud pen-ioners of the United States. The officials of the pension bureau say they have evidence of a conspiracy between the clerks in the pension office, and all methods by which applicants for pensions have been defrauded on the repre-sentations of the conspirators who push along their claims and secure them pensions in advance of the regular proceedings of the office. During the latter part of June this year they became aware of the existence of such a conspiracy, and an investigation was instituted, which resulted in the arrests made to day, and will call for the arrest of other clerks on further evidence being obtained.
